**Subject:** Request to chat for 5-10 minutes today (between now and 8:15am or 12-1pm) regarding Nitrate levels in private wells in Juneau County, Wisconsin

Good morning Steve,

I hope that you're doing well. Would you have 5-10 minutes today for me to call you and discuss the nitrate results from private well sampling in Juneau County? I am currently free of meetings until 8:15 and then available between 12 and 1. Hopefully we can squeeze in a call during one of those times.

I wanted to make sure that you were aware of a meeting that has been set-up between R5's Jim Payne (our acting deputy regional administrator) with Linda Holst and WDNR's James Zellmer this Thursday, 7/10, at 1pm, to discuss the nitrate results from private wells sampled by the local health department and EPA R5 in Juneau County. In addition, are you aware of the Juneau County Health Department's (JCHD) planned educational session at Necedah Town Hall at 6:00 PM on July 17<sup>th</sup> that will be open to the Town of Armenia? JCHD will let the citizens know of the outcome of their sampling event, such as the general results (104 private wells sampled). Barb Theis from the LHD has requested that EPA attend to speak to the sampling we have done in NE Juneau County, Wisconsin. The plan is for one on one conversations for the homeowners that had their wells tested.

Our CWA water enforcement branch has been in contact with the LHD and WDNR but I wanted to make sure that drinking water is aware of the findings. I know that Tom emailed you the range of the 5 private well results from EPA sampling back in May. Tom is now out of the office until July 23<sup>rd</sup> so he asked that I touch base with you.

I appreciate your time and look forward to touching base with you.

Best wishes,  
Heather
